DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2018-P-3412]

Determination that QVAR 40 and QVAR 80 (Beclomethasone Dipropionate HFA) Inhalation Aerosol, 40 Micrograms and 80 Micrograms, were not Withdrawn from Sale for Reasons of Safety or Effectiveness

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) has determined that QVAR 40 and QVAR 80 (beclomethasone dipropionate HFA) inhalation aerosol, 40 micrograms (mcg) and 80 mcg, were not withdrawn from sale for reasons of safety or effectiveness. This determination will allow FDA to approve abbreviated new drug applications (ANDAs) for QVAR 40 and QVAR 80 (beclomethasone dipropionate HFA) inhalation aerosol, 40 mcg and 80 mcg, if all other legal and regulatory requirements are met.

FOR FURTHER INFORMATION CONTACT: Nikki Mueller, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6280, Silver Spring, MD 20993-0002, 301-796-3507.

SUPPLEMENTARY INFORMATION: In 1984, Congress enacted the Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98-417) (the 1984 amendments), which authorized the approval of duplicate versions of drug products under an ANDA procedure.

ANDA applicants must, with certain exceptions, show that the drug for which they are seeking approval contains the same active ingredient in the same strength and dosage form as the “listed

drug,” which is a version of the drug that was previously approved. ANDA applicants do not have to repeat the extensive clinical testing otherwise necessary to gain approval of a new drug application (NDA).

The 1984 amendments include what is now section 505(j)(7) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(j)(7)), which requires FDA to publish a list of all approved drugs. FDA publishes this list as part of the “Approved Drug Products With Therapeutic Equivalence Evaluations,” which is known generally as the “Orange Book.” Under FDA regulations, drugs are removed from the list if the Agency withdraws or suspends approval of the drug’s NDA or ANDA for reasons of safety or effectiveness or if FDA determines that the listed drug was withdrawn from sale for reasons of safety or effectiveness (21 CFR 314.162).

A person may petition the Agency to determine, or the Agency may determine on its own initiative, whether a listed drug was withdrawn from sale for reasons of safety or effectiveness. This determination may be made at any time after the drug has been withdrawn from sale, but must be made prior to approving an ANDA that refers to the listed drug (§ 314.161 (21 CFR 314.161)). FDA may not approve an ANDA that does not refer to a listed drug.

QVAR 40 and QVAR 80 (beclomethasone dipropionate HFA) inhalation aerosol, 40 mcg and 80 mcg, are the subject of NDA 020911, held by TEVA Branded Pharmaceutical Products R&D, Inc. (TEVA), and initially approved on September 15, 2000. QVAR 40 and QVAR 80 are indicated for the maintenance treatment of asthma as a prophylactic therapy in patients 5 years of age and older.

Aurolife Pharma LLC submitted a citizen petition dated September 6, 2018 (Docket No. FDA-2018-P-3412), under 21 CFR 10.30, requesting that the Agency determine whether QVAR

40 and QVAR 80 (beclomethasone dipropionate HFA) inhalation aerosol, 40 mcg and 80 mcg, were withdrawn from sale for reasons of safety or effectiveness.

After considering the citizen petition and reviewing Agency records and based on the information we have at this time, FDA has determined under § 314.161 that QVAR 40 and QVAR 80 (beclomethasone dipropionate HFA) inhalation aerosol, 40 mcg and 80 mcg, were not withdrawn for reasons of safety or effectiveness. The petitioner has identified no data or other information suggesting that QVAR 40 and QVAR 80 (beclomethasone dipropionate HFA) inhalation aerosol, 40 mcg and 80 mcg, were withdrawn for reasons of safety or effectiveness. In addition, the petitioner provided information indicating that TEVA made a business decision to discontinue manufacturing of these drug products. We have carefully reviewed our files for records concerning the withdrawal of QVAR 40 and QVAR 80 (beclomethasone dipropionate HFA) inhalation aerosol, 40 mcg and 80 mcg, from sale. We have also independently evaluated relevant literature and data for possible postmarketing adverse events. We have reviewed the available evidence and determined that these drug products were not withdrawn from sale for reasons of safety or effectiveness.

Accordingly, the Agency will continue to list QVAR 40 and QVAR 80 (beclomethasone dipropionate HFA) inhalation aerosol, 40 mcg and 80 mcg, in the “Discontinued Drug Product List” section of the Orange Book. The “Discontinued Drug Product List” delineates, among other items, drug products that have been discontinued from marketing for reasons other than safety or effectiveness. ANDAs that refer to QVAR 40 and QVAR 80 (beclomethasone dipropionate HFA) inhalation aerosol, 40 mcg and 80 mcg, may be approved by the Agency as long as they meet all other legal and regulatory requirements for the approval of ANDAs. If

FDA determines that labeling for this drug product should be revised to meet current standards, the Agency will advise ANDA applicants to submit such labeling.

Dated: March 29, 2019.

Lowell J. Schiller,

Acting Associate Commissioner for Policy.
